LinkedIn — GitHub — Jaipur, Rajasthan

Summary

Aspiring **Python Developer and Data Engineer** with hands-on experience in building scalable **data pipelines**, ETL workflows, and backend systems. Proficient in Python, SQL, and API development with strong understanding of **data warehousing, batch processing, and real-time analytics**. Passionate about solving real-world problems using data-driven systems.

Technical Skills

- **Programming:** Python, SQL, Java
- **Data Engineering:** ETL Pipelines, Data Modeling, Data Cleaning, Data Transformation, Batch Processing
- **Libraries:** Pandas, NumPy, Scikit-learn, XGBoost
- **Backend:** Flask, REST APIs
- **Visualization:** Power BI, Plotly Dash
- **Databases:** MySQL, SQLite, MongoDB
- **Tools:** Git, GitHub, Docker (Basic), Jupyter Notebook
- **Data Tools:** Apache Airflow (Basic), Data Warehousing Concepts
- **Cloud (Basics):** AWS / GCP Fundamentals
- **Concepts:** DSA, OOPS, Machine Learning

Education

Poornima University B.Tech in Computer Science (CGPA: 8.5)	2023 – 2027 Jaipur, Rajasthan
Tagore Public School 12th CBSE Board (85%)	2022 – 2023 Jaipur, Rajasthan

Projects & Experience

RetailPulse E-commerce Sales Intelligence Dashboard <i>Python, Plotly Dash, SQLite, XGBoost</i>	2025
---	------

- Designed and implemented a scalable **ETL pipeline** to process 50,000+ transaction records.
- Engineered interactive dashboards delivering real-time insights into sales, retention, and product analytics.
- Implemented **RFM segmentation** and trained churn prediction model (ROC-AUC: 0.84).
- Optimized SQL queries using window functions, improving query performance by 30%.

Customer Churn Prediction System (API + Dashboard) <i>Python, Flask, Scikit-learn, Pandas, Streamlit</i>	2025
--	------

- Built end-to-end **machine learning pipeline** including preprocessing, feature engineering, and model training.
- Developed REST APIs using Flask for real-time prediction serving.
- Designed interactive dashboard for monitoring churn risk and business insights.

Data Processing Pipeline <i>Python, Pandas, SQL</i>	2025
---	------

- Developed automated pipeline for extracting, transforming, and loading (ETL) large datasets.
- Integrated cleaned data into SQL database for analytics and reporting.
- Reduced manual preprocessing effort by 40% through automation.

Certifications

- Learning Analytics Tools – NPTEL (IIT Kharagpur)
- Introduction to IoT – NPTEL (IIT Bombay)

Achievements

- Solved 380+ DSA problems across LeetCode, GfG, and Coding Ninjas.
- Participated in Smart India Hackathon and SAP Hackfest.
